# UNI- SAFETY NET

WE ARE FORMING YOUR IDEAS

# UNI- SAFETY NET

---

Construction Safety Nets are used at high-rise building construction sites for preventing accidental fall of people or objects in the site.

Construction safety nets are the safest and the most cost-effective fall prevention system in the world.

## Advantages:

- Light Weight
- Water Resistant
- Weather Resistant
- Easy To Install

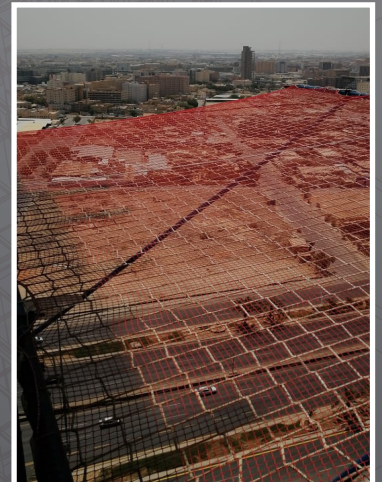

## TECHNICAL DATA :

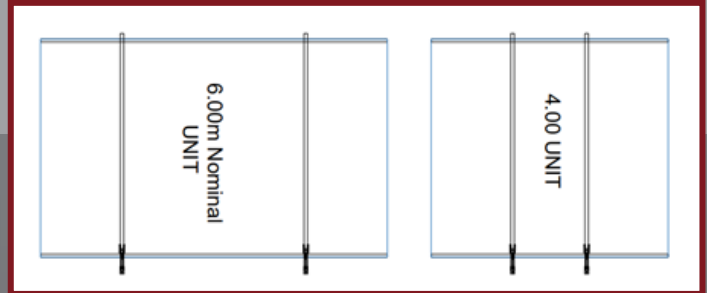

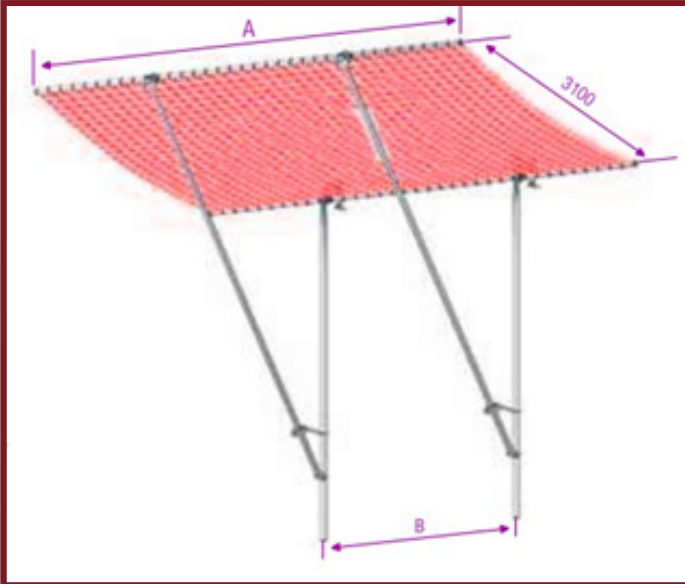

- Fully Compliant Nets and Assembly manufactured to EN Standards
- Double layer nets made up of 60x60 and 20x20 nets (Heavy Duty) or 100x100 and 20x20 nets (Medium Duty) manufactured from high density polypropylene (HT, PP) material with an optional light duty Debris net as third layer.
- UV Treatment to resist sun damage.
- 3.1m Standard width or 4.7m Extra Wide width
- Resistant to high wind loads, able to be tied top/ bottom against overturning.
- 0.85m overlap between units providing more protection between units
- Full range of accessories to enable connection to various types and shapes of structures.
- Manufactured from Steel (Painted or Galvanized finish) and Patented Extruded Aluminum profiles to provide optimum strength and weight.

## SAFETY NET TYPE :

- Standard type
- Wide type
- Vertical type

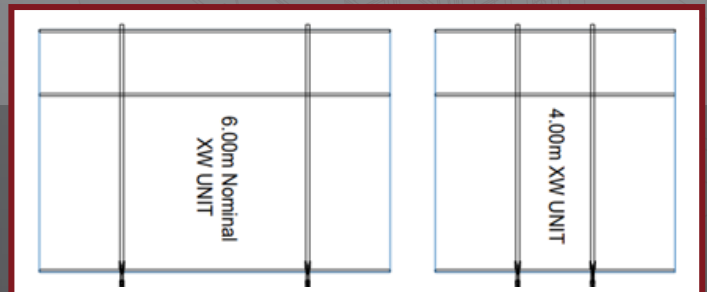

# STANDARD TYPE

Body Type	Width	A	B	Weight *
2.75m	3.10m	5.85m	3.50m±0.25	109 kg
2.75m	3.10m	4.00m	1.65m±0.25	100 kg
3.25m	3.10m	5.85m	3.50m±0.25	114 kg
3.25m	3.10m	4.00m	1.65m±0.25	105 kg

# WIDE TYPE

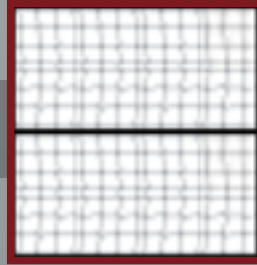

Body Type	Width	A	B	Weight *
2.75m	4.70m	5.85m	3.50m±0.25	127 kg
2.75m	4.70m	4.00m	1.65m±0.25	114 kg
3.25m	4.70m	5.85m	3.50m±0.25	132 kg
3.25m	4.70m	4.00m	1.65m±0.25	119 kg

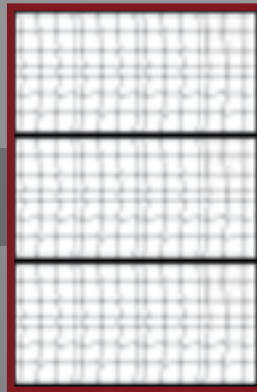

# VERTICAL TYPE

Width	Length
4.0 m 6.0 m 7.0 m 9.0 m	7.5 m
4.0 m 6.0 m 7.0 m 9.0 m	11.5 m
4.0 m 6.0 m 7.0 m 9.0 m	15 m
