WE ARE FORMING YOUR IDEAS

Special Steel Panels Formwork | Tailor Made

We are introducing our Special Steel Panels Formwork System as its most economical system for special applications that can be designed for any concrete shape and dimension, ensuring a high quality concrete surface finish , simple and fast assembly on site with minimum labor requirements.

Advantages:

- Dimensional Accuracy.
- Quality Concrete Finish.
- Reduced Cycle Times.
- High Reuse.
- Elimination of down time for replacing form face.
- Cost effective construction of complex.

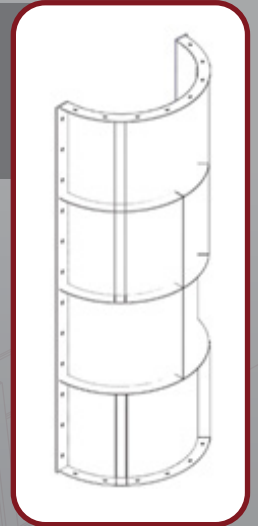

Applications:

- Precast Units
- Tunnel Forms
- Girders, Beams & Parapets
- Trenches
- Block Molds.
- Round Column Forms (Standard Product)
- Pier Column & Flairs
- Conical & Special Shapes Structure

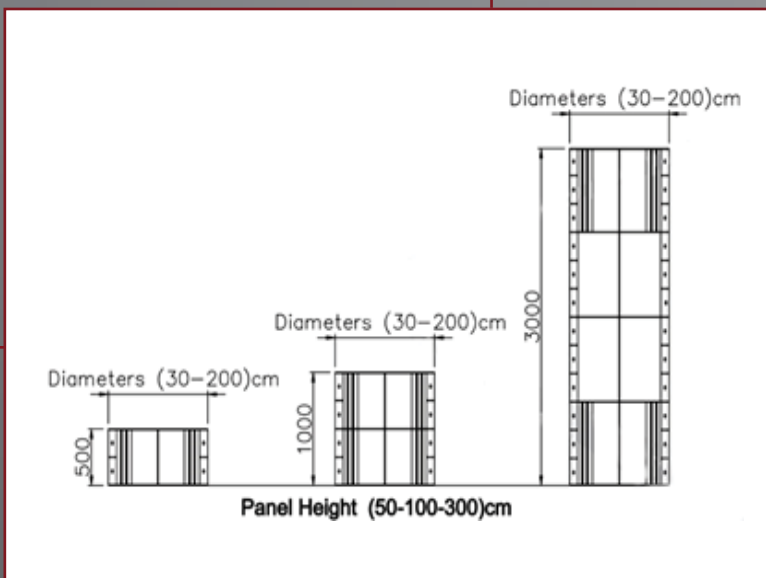

Round Column Forms (Standard Product)

This system is composed of two halves circular panels to form a circular mold in different diameters and heights.

Technical Data:

- Permissible Concrete Pressure: up To 150 KN/m²
- Size: Adaptable with any diameters and heights
- Cladding: 3-4 mm

Panels range:

- Height increments of 500 mm can be achieved using variable panel height.
- Panel height (50 - 100 -300) cm.
- Panel diameters variable (30 cm to 200 cm) & Special sizes upon request.
